

HOSEREEL 7

Product group
Hose included?

900

This seven stage hose reel is a great help keeping the workshop floor free from hose coils and it significantly reduce time when cutting hose. No more running back and forward between the pallet racking and the cutting machine. Every stage except the bottom one can be swung out horizontally to load a new coil. Because of the new design with smaller reels there is a big saving on freight. To further increase the flexibility of the HoseReel 7 a wheel kit is available as an option.

	Height (mm)	Length (mm)	Width (mm)	Weight (kg)
